Homework #1: Introduction to Databases

[After deadline not accepted in all cases]

Name **Student-ID**

1. **Conceptual DB Schema** VS **Logical DB Schema.** How conceptual schema is different from logical schema. Clearly explain using your example(s).
2. **Database Models.** List 3 database models of your choice. Consider your own database example, then show your database using each of the 3 models. For each, compare its characteristics in terms of pros and cons with another database model.
3. **Benefits and Drawbacks of DBMS.** List benefits and drawbacks of DBMS over file-processing system. Clearly explain each one using your example(s).
4. **DBMS systems.** List 3 DBMS (extra score if not discussed in class !!) with their characteristics and components. For each DBMS, identify type of database models it supports.
5. **Database Applications.** List 3 applications that use databases. For each one, identify database models and DBMS that have been used.
